## Hohenstein opens new testing lab in Shanghai

*Another laboratory location in China will serve a hub of the textile industry*

BÖNNIGHEIM, Germany (December 13, 2022) – With the opening of another laboratory in Shanghai, China, testing service provider Hohenstein is growing its international network. Starting in the first quarter of 2023, the new textile laboratory in the Pudong District industrial park will supplement its Hong Kong laboratory capacity with testing and on-site inspection services in the hot spots of textile production.

The new laboratory will offer suppliers, manufacturers, brands and retailers a wide range of textile testing services. "Hohenstein stands for innovation and quality. We are very pleased to celebrate another milestone in our international expansion, while following these principles," said Prof. Dr. Stefan Mecheels, who is the third generation to lead the family-run company. "No matter where the examinations, tests and analyses are carried out, all our laboratories work with state-of-the-art equipment and the same high standards."

The laboratory locations in Germany, Hong Kong, Bangladesh, India, Hungary, and now Shanghai, offer shortened turnaround and sample transport times. In some locations, Hohenstein offers sample pick up services from the customer to the lab for testing. Mecheels emphasizes, "Hohenstein is also aiming for customer proximity. Our goal is responsiveness and flexibility for our customers."

### **About Hohenstein**

With more than 40 offices and laboratories, Hohenstein is an international partner for independent testing, certification and applied research around the human-textile-environment interaction. They develop science-based methods and standards that consider the user in real life, not just in the lab. Through standard or customized testing, and interpretation of the results, Hohenstein experts solve problems, verify claims and help partners bring better, safer products to market – more sustainably. Hohenstein is a founding member and leading provider of the OEKO-TEX® portfolio of services, and is certified by the U.S. Consumer Products Safety Commission (CPSC ID #1058) as a third-party, independent laboratory for CPSIA compliance verification.
