Overview

- For any use or mention of an OEKO-TEX® label, the product and all its components, including accessories, must meet the criteria catalogue requirements without exception, as proven by the OEKO-TEX® certificate.

- End products always require their own label number, even if all components have already been successfully tested and certified - “Ingredient labeling” is not allowed.

- An OEKO-TEX® claim is only valid if the relevant label number & test institute are displayed.

- Although many brands/retailers have requirements for including an OEKO-TEX® label, use is encouraged, but not mandated, by OEKO-TEX®. But, for traceability, if an OEKO-TEX® claim is mentioned online, the corresponding label must be included on either the packaging or the product itself.

- If you discover misuse of OEKO-TEX® labels or certificates, please email misuse@hohenstein.com.

- If you discover misuse of OEKO-TEX® labels or certificates, please email misuse@hohenstein.com.
OEKO-TEX® Brands & Trademarks

• **OEKO-TEX®** design rules and correct references must be observed - for all forms of public use - in order to maintain standardized appearance and consumer recognition.

• **OEKO-TEX®** is the umbrella brand over all product brands (STANDARD 100 by OEKO-TEX®, MADE IN GREEN by OEKO-TEX®, LEATHER STANDARD by OEKO-TEX®, ECO PASSPORT by OEKO-TEX®, STeP by OEKO-TEX®, DETOX TO ZERO by OEKO-TEX®).

• Internationally registered and protected trademarks include the umbrella brand and claim+ product logos.

• Correct reference includes ®, capitalization, hyphen and word order e.g. “STANDARD 100 by OEKO-TEX®” not “Oekotex 100”

• Please contact us if you have any questions about the design or labeling rules. We are happy to help.

Proper Use

Logo

Who:
• OEKO-TEX® customers with valid certificate
• Distributors or retailers who carry at least one product with a valid certificate
• Media, collaborating organizations

Where:
• **Never** on, nor in reference to, a specific product
• Use for **general company statements** about stewardship practices in company marketing materials
• Highly recommended: include a suggestion to look for the label on qualified products

Product Label

Who:
• OEKO-TEX® customers with valid certificate
• Distributors or retailers who carry at least one product with a valid certificate

Where:
• **Always in clear reference to a specific, qualified product, whose OEKO-TEX® certificate number it bears**
• On product
• To promote labeled products through product marketing, webpages, social media, displays, catalogues, media, advertisements, etc

Clear Product Reference
Always Required

Correct ID
All references must include the correct label number & institute name

Specific Product
For all references to an OEKO-TEX® label, it must be absolutely clear to which product the OEKO-TEX® label refers, including:
- Label/text positioning
- Website copy or page
- Signage
- Advertising
- Marketing/PR

Official Claims
Unrelated claims must be clearly separated
Additional text that goes beyond the default wording of the OEKO-TEX® label may only be used outside of the label
Ingredient Labeling
Never Allowed

To prevent greenwashing, social washing, confusion:

- Promoting a product by using the label of an ingredient or component when the entire product is not certified is NOT allowed.
  “The fabric in this product is STANDARD 100 by OEKO-TEX® certified”

- General communication about using certified or labeled components is NOT permitted.
  “Our products contain only OEKO-TEX® certified materials”

**Additional Example - Bedding covers:** Because of the different distribution channels of cover and filling material manufacturers, the OEKO-TEX® label may only be attached to the outside if both cover and filling have been successfully tested according to STANDARD 100 by OEKO-TEX®
Clear Separation from Unrelated Claims

Frame around contents

Exception: protected area without frame

Permission may be granted if label contents are protected by at least \(1\times\) on all sides.

Ensure label contents are proportionately resized and meet the equivalent minimums for a label with the frame.
Minimum Sizes

To ensure legibility:

• Observe minimum sizes for use in any medium
• Enlarging is encouraged - always scale dimensions proportionately
• Use appropriate resolution for clarity
• Adjust height proportionately for labels with multiple languages

Print/Digital

- ≥ 27 mm (1.063”) with QR Code
- ≥ 40 mm (1.575”) with QR Code

Special/PPE

- ≥ 15 mm (0.591”)
- ≥ 27 mm (1.063”) with QR

Woven Label

- ≥ 42 mm (1.654”)
- ≥ 44.5 mm (1.791”) with QR

Minimum Sizes

• ≥ 22.5 mm (.886”)
• ≥ 27 mm (1.063”) with QR Code
• ≥ 44.5 mm (1.791”) with QR Code

- We had this product independently certified with STANDARD 100 by OEKO-TEX® so that you don’t have to worry about harmful substances in your [certified item]

- STANDARD 100 by OEKO-TEX® certification keeps you and your family safe from harmful substances

- The STANDARD 100 by OEKO-TEX® label empowers you to make responsible decisions for you and your family

- OEKO-TEX® is a global certification system you can trust. Products with the STANDARD 100 by OEKO-TEX® label have been independently tested for harmful substances according to strict scientific criteria that go beyond legal regulations

- This product was independently tested for harmful substances according to the strict global criteria of STANDARD 100 by OEKO-TEX®

- Our STANDARD 100 by OEKO-TEX® certified products have been independently tested for harmful substances according to strict global criteria

- This [product] and its components have been tested against a list of over 400 harmful substances according to STANDARD 100 by OEKO-TEX®

- Check the validity of this STANDARD 100 by OEKO-TEX® label on oeko-tex.com

- STANDARD 100 by OEKO-TEX® is an independent, third-party certification system based on scientific parameters for maintaining good health

- STANDARD 100 by OEKO-TEX® means a product was tested for harmful substances in compliance with globally consistent test criteria that consider different ways a substance can be absorbed into the body, including through skin contact and respiration

- The STANDARD 100 by OEKO-TEX® product label is for consumers who want apparel and textile products that have been independently tested for harmful substances. OEKO-TEX® test criteria consider global legal regulations, non-government organizational requirements and scientific data on maintaining good health
STANDARD 100 by OEKO-TEX® is an independent certification and product label for textile products throughout the supply chain that are tested for harmful substances

STANDARD 100 by OEKO-TEX® certifies that each component of a product has been tested for harmful substances according to strict scientific criteria that stays ahead of global legal regulations

The OEKO-TEX® restricted substance list (RSL/MRSL) and test criteria consider the latest scientific research, global regulations, current industry technology, and NGO demands: Legally banned and controlled substances, substances that may be harmful to health, biologically active and flame retardant substances

The OEKO-TEX® RSL/MRSL and criteria catalogue consist of over 400 harmful substances

The STANDARD 100 by OEKO-TEX® label gives consumers confidence that certified products meet strict limit values for harmful substances in accordance with the global requirements set by the OEKO-TEX® Association

STANDARD 100 by OEKO-TEX® certification requires testing for harmful substances in compliance with globally consistent test criteria that consider all the ways a substance can be absorbed into the body, including through skin contact and respiration

We offer STANDARD 100 by OEKO-TEX® certified [materials] to [reduce your testing cost/make it easier to certify your own product/increase the safety of your products/facilitate traceability in your supply chain]

Integrated into procurement processes throughout the supply chain, STANDARD 100 by OEKO-TEX® is used as independent verification in product safety, sustainability and consumer labeling programs

The STANDARD 100 by OEKO-TEX® certification system requires testing because safety from harmful substances cannot be verified by visual inspection alone

Our products have been checked against a list of over 400 harmful substances and successfully tested according to the STANDARD 100 by OEKO-TEX® certification system
As part of our [quality/safety/traceability] program, we accept STANDARD 100 by OEKO-TEX® certification from our suppliers in place of additional harmful substance testing requirements. Contact usa@hohenstein.com to learn more.

Incorporating ECO PASSPORT by OEKO-TEX® certified chemicals into our supply chain is part of a broader sustainability program at [company].

Use of ECO PASSPORT by OEKO-TEX® certified chemicals is a requirement of the supplier program at [company].

As part of our [sustainability/quality/safety/traceability] program, we accept ECO PASSPORT by OEKO-TEX® certified chemicals from our suppliers.

As part of our STANDARD 100 by OEKO-TEX® certification process, we prefer ECO PASSPORT by OEKO-TEX® certified chemicals. Contact usa@hohenstein.com to start the certification process.
Using Supplier Labels

• Ensure that product is included in the certificate scope
  - require valid certificates with purchase
• Using a supplier’s label is only allowed if product from the supplier remains unchanged when resold
• Labels must be obtained from the label owner
